

# Quality and Innovation

The Quarella Group of Verona has always been among the avante garde in marble, granite and quartz based stone and is a leader in the sector thanks to continuous technical/aesthetic innovation and readiness to invest in technological research.

## EVO AND THE LATEST DEVELOPMENTS

EVO is a highly innovative product and represents an evolutionary leap in marble, both for its improved technical/presentational features and for the continuously evolving colour schemes on offer.

Indeed, this extraordinary line will not only be enhanced with new, exclusive colours, but formats have also been improved.

This has given rise to **evo<sub>80</sub>**, the latest development in the EVO line, featuring **78x303 cm** slabs, a format that reduces processing waste but above all enhances the aesthetic quality and the design, which make this line stand out.

In addition to the new formats, **two new colours** will be presented:

**NOTTURNO BELGA\***

**BIENNO\***

An exclusive blend of originality and minimalism that makes any environment elegant and modern.

The colours in the current range are: white, black and uniform beige (monochrome), green, hazel with a light, tone-on-tone texture (two-colour), streaky beige and salt and pepper white.

\*Colours offered will be confirmed following the exhibition.

### SPECIAL FEATURES

-  Made from silica powder, Evo, like all the best known quartz based materials, gives **products in common use excellent resistance to acids.**
-  Evo is produced in blocks, from which slabs measuring 123x305 cm and **78x303 cm\*\*** are cut. Standard thicknesses are 1,2 and 3 cm, but greater thicknesses (for complete blocks) can be produced on request. Marble-chip floor tiles are also available in different formats: 30x30x1,2 cm; 30x60x1,2 cm; 60x60x1,2 cm.
-  Evo is made from extremely fine powder, enabling the creation of aesthetically-pleasing, refined and modern products.
-  Evo is available both in Gloss (standard) and Matt (opaque/velvety) finish.
-  Evo is made using an innovative production process called **Qzero** which ensures the material is eco-compatible in every way.

\*\* New line presented at Marmomacc 2010, available from January, 2011.

## LIVING AND THE NEW TRENDS 2011

In pursuit of constantly shifting trends, Quarella intends to astound its customers again this year, launching even more new colour schemes.

This time, it's the turn of the Living line range to be enhanced. Five new colours, dark and stark. Nuances that make any ambience elegant and fashionable, creating a modern and trendy atmosphere.

These are the new Living colours:

**ODISSEY BLACK\* • SAPPHIRE\***  
**NERO TENERIFE\* • NERO SENATORE\***
